DUCK LAKE.

Mr. Lovell of the Indian Department,
had to shoot a very fine colt on Thursday,
it having got its leg broken by some
means.

H. J. Montgomery, R. T. Dodd and T.
O. Davis are doing our town.

We are to have a butcher shop. A new
corner has arrived for this purpose from
Moose Jaw.

The graders are now working eighteen
miles west of here, and another outfit is
expected here to day.

There will be no celebration here to-
morrow, but it is expected there will be a
big time on the 1st of July.

The Lawn Tennis Club had its first
practice this week. Result, a broken
window, lost ball and several other mis-
haps.

Mr. H. Mitchell left for your town on
Thursday.

The crops never looked better than at
present. All say we are further advanced
than you are.

Mr. G. Carter will go south shortly to
purchase another band of sheep. Both
he and Mr. Dehl are shearing this week.
They report that their sheep wintered
fine, and lambs doing extra well.

Stobart & Co. have the contract for
freighting the Indian Department's flour,
which will come this year via the railway
to Saskatoon.

If the town site has been located 'tis
not yet been made known.

W. B. Cameron, Indian Department
clerk, left yesterday for Regina. He will
return in ten days, bringing his mother
and sisters with him, who will reside here
permanently.

Weather fine.

CLARK'S CROSSING.

The first locomotive on the Regina &
Saskatchewan railway reached Saskatoon
on Tuesday, rails having been laid to the
river on that day. The occasion was one
of joy. The settlers of the Temperance
Colony and children yet unborn will hear
of it.

The work on the bridge across the
branch at the end of track is progressing.
The contractors put a wire cable across
the river this week and will do their own
ferry work.

Grading operations on the west side
are being pushed rapidly. Messrs. Mann
Bros. and Matheson were to move camp
further north yesterday.

A summons was issued yesterday
against Deamus Madigan at the instance
of Capt. Ross on a charge of cruelty to
animals. The hearing was set for four
o'clock and considerable interest was
manifested, but when the hour arrived
Ross declined to prosecute.

A goodly number of new settlers have
arrived in the colony up to this spring,
and Saskatoon now boasts of a tonorial
artist and a druggist.

There are nine boarding houses in the
village.

Sergt. Montgomery of your town is
visiting friends and renewing acquaint-
ances in Saskatoon.

SCHOOL BOARD.

A special meeting of the Board of
Trustees was held at the Secretary's
office on Saturday last. Present—Mr.
Johnson, chairman; and Messrs. Gunn
and Davis.

An account was received from E. J.
Cann for \$186.47 for school desks, sta-
tionery, etc., and on motion of Messrs.
Davis and Gunn, the amount for desks
was ordered to be paid and the balance
referred back for further information.

Davis—Gunn—That in future supplies
for schools be purchased only on an order
from chairman or secretary. Carried.

Tenders for books of reference required
by High School were handed in by
Messrs. Cann and Jardine. Ordered to
be laid on the table.

Davis—Gunn—That the chairman be
instructed to get from Mr. Mustard a de-
tailed list of the books approved of by
him, from the list furnished by the Board
of Education, and submit the same for
tender.

The meeting then adjourned till next
regular meeting, June 2nd.

PRINCE ALBERT.

Bright Prospects for This District—Farmers Increasing Their Acreage—An Excellent Stock Country.

The Winnipeg Free Press of May 9th contains the following:—

Mr. J. F. Betts, member of the Northwest Advisory Board, who has been in the city for a few days with Mrs. Betts, will leave for Prince Albert to-morrow. Mr. Betts, is enthusiastic over the prospects of the Northwest, particularly the Prince Albert district. Now that railway communication is assured, he anticipates a great influx of settlers to North-west Saskatchewan during the next few years, which of course means development and progress. The people of Prince Albert, Kinsistino and Batoche are organizing an emigration campaign in Ontario. Mr. Betts and Mr. Plaxton will appropriate \$300 of the funds granted by the Assembly for their respective districts to send a lecturer east for a couple of months. This sum will be supplemented by \$300 from the Town Council and the Agricultural Society and subscriptions from citizens. Besides the lecturer several delegates will be sent east from the various settlements with a view inducing intending emigrants to locate in the Prince Albert district. These delegates will be provided with free transportation by the C.P.R. Some of them are already on the way. The paid lecturer will spend June and July among the farmers. It is hoped that many of the eastern farmers who come up on the harvest excursion will visit Prince Albert. They will be met at the end of the R. & L.L. railway and driven through the district and brought back to the railway without charge.

Mr. Betts states that farmers finished their wheat seeding nearly two weeks ago around Prince Albert. The spring season there was earlier than along the main line of the C.P.R. from Regina eastward. The acreage under crop this year will be fifty per cent larger than it has been for the past few years. The farmers have been encouraged to extend their operations on account of the construction of the R. & L.L. railway, by which they will be able to export their grain. Taking Prince Albert as a centre, Mr. Betts says the whole of a radius of one hundred miles is composed of excellent agricultural lands and contains some good settlements. The country north of the river and to the west of Prince Albert will be expected, he subdivided into sections this year. The government has been memorialized to do so, and a report has been received from Ottawa that the work will be undertaken without delay.

The Prince Albert district boasts of some very fine stock notwithstanding its isolation. It is said that a finer lot of horned cattle cannot be found anywhere in the Northwest than the herd owned by the Prince Albert farmers, who have from time to time clubbed together and imported some very fine breeding stock. No cattle have yet been exported from the district, but ready sale is found in the local market for available stock. One thousand head were sold last year to the Police and Indian Department and for home consumption. The demand this year will be much greater owing to the railway construction. Sheep prosper remarkably well in this district. The largest flock in the district, 1,000 head, belong to Mr. MacArthur. There are numerous other flocks comprising from twenty to four hundred head. Mr. MacArthur began sheep-raising in 1885, when he imported a flock of three hundred Montana sheep and crossed them with thoroughbred Southdowns.

A portion of the July number of the Western World will be devoted to a description of Prince Albert, Batoche and Kinsistino districts, which will be illustrated with scenes in the various settlements. A pamphlet regarding the country will be issued shortly.

Speaking of frost and drought in the Northwest, Mr. Betts states that during a residence of eleven years he has never seen a total failure of crops from either cause in the North Saskatchewan settlements. The climatic conditions there are very similar to those which prevail in this Province.

The Victoria Soap works, one of Winnipeg's infant industries, located at the foot of Stephen street, was destroyed by fire at an early hour this morning. The alarm was given from the Ogilvie mill at 2:30 and the north fire bell turned out promptly, but owing to the distance of the building from a tank, water could not be secured in time to save the structure. Loss \$1,000.

THE EXPERIMENTAL FARMS.

Seeding began at Brandon the first week of April just a month later than last season. Last year's wheat experiments were to a considerable extent, abortive, as nearly all the grain had to be sown on land in the very worst condition for resisting the extreme drought. This year no such difficulty exists, and no land could be in a better state of preparation for the work it is expected to do. It will be handled in four main divisions. The first grain, on excellent summer fallow, will be under wheat, oats and barley. Broadcast seeders and both common and press drills will be used, and several varieties of seed, to test deep against shallow, thick against thin, early against medium and late seeding, and frozen against unfrozen wheat, all weighed and the plots measured. The second division will be used to test the merits of the different varieties. In addition to the former sorts, many new ones have been brought in from Europe, and nine varieties brought in last year by Duncan MacArthur of Winnipeg, mostly of East Indian origin. In the third division the standard grains of Canada, Red Fife, common barley, Welcome and Black Tartarian oats will be tried against rarer sorts. In the fourth division roots and fodder plants will have full and varied trials. This division will prove of greater interest this year than ever before. One important service to be rendered by this farm the farmers of the Province are already finding out. Mr. Bedford is flooded with requests from all quarters for seed which he sells as far as it will go in lots no larger than two bushels, and cannot come near supplying the demand. Unless some untoward accident intervenes, this farm is now in a position to do all that can reasonably be expected from it, and will be a sight worth seeing all summer.

The Experimental Farm at Indian Head is also in the best working order, and was well covered with snow, an immense advantage in this climate. Everything promises admirably for a good season's results, and building on both places will be pushed as far as is found necessary. —Nor-West Farmer.

BID THEM COME IN.

In a book now nearly 2,000 years old is described a best prepared for those who came out, but eaten by others before undesired. In Canada's invitation to settlers to come and occupy the immense fertile breadths of Western Canada, certain classes have been selected as desirable, while others were deterred. We may properly ask if this is advisable, considering the enormous area awaiting settlement and the other competitors for home seekers now displaying great energy. If our object is to cause a flow of people from older settled countries, then great and right efforts should be exerted to that end, and when the stream is flowing free it will be high time to stretch the boom across to catch the drift wood. Of course give us for settlers farmers with experience or capital, or with both, but do not shut out all those directly or indirectly connected with them, who aid in supplying their wants, providing their markets, and sharing in the work of building up the nation. —Colonist.

At a meeting of the stockholders of the Ontario Mining company held at Winnipeg the following directorate were elected: Messrs. H. G. McMicken, M.M. Wheeler, S. T. Ewart, H. J. Belch, Jr., Bennett. At a subsequent meeting of the directors Mr. Ewart was elected president and Mr. McMicken vice-president. Mr. J. K. Strachan was appointed permanent secretary.

MONTREAL, May 12.—Sir Geo. Stephen has called upon Mayor Grenier with reference to the approaching visit of the Duke and Duchess of Connaught. Their Royal Highnesses will arrive here on the 3rd of June and will stop for one day, during which time they will be the guests of Sir George and Lady Stephen. The Duke has consented through the Governor-General, his willingness to accept an address from the corporation and Sir George has promised to use his best efforts to induce their Royal Highnesses to come to the city hall on the 4th, to be presented publicly with the address.

Coughs, Colds, Croup.

action, and imparts strength to the whole system. Such is the immediate and satisfactory effect that it is warranted to break up the most distressing cough in a few hours' time, if not of too long standing. It contains no opium in any form and is warranted to be perfectly harmless to the most delicate child. There is no real necessity for so many deaths by consumption when Allen's Lung Balsam will prevent it if only taken in time. For Croup, Asthma and all diseases of the Lungs, ALLEN'S LUNG BALSAM is the Great Modern Remedy. For Croup and Whooping Cough it is almost a specific. It is an old standard remedy, and sold universally at 50 cents and \$1.00 per bottle. The 25-cent bottles are put out to answer the constant call for a Good and Low-Priced COUGH CURE. If you have not tried the Balsam, call for a 25-cent bottle to test it.

Allen's Lung Balsam was introduced to the public after its merits for the positive cure of such diseases had been fully tested. It excites expectoration and causes the Lungs to throw off the phlegm or mucus; changes the secretions and purifies the blood; heals the irritated parts; gives strength to the digestive organs; brings the liver to its proper action, and imparts strength to the whole system. Such is the immediate and satisfactory effect that it is warranted to break up the most distressing cough in a few hours' time, if not of too long standing. It contains no opium in any form and is warranted to be perfectly harmless to the most delicate child. There is no real necessity for so many deaths by consumption when Allen's Lung Balsam will prevent it if only taken in time.
